

AHS TARGETED PUBLIC HEALTH MEASURES UPDATE

FREQUENTLY ASKED QUESTIONS

UPDATED NOVEMBER 25

The following questions are based on the recent Public Health Measures put in place as a result of the [Public Health Order](#) issued November 12, and the state of public health emergency that was declared on November 24. Violation of a public health order is subject to fines up to \$1,000 and it is imperative all Members review and communicate these measures with their players and families.

1. When do the new Government restrictions - announced on November 24 - start to apply to hockey?

As per the guidance on [Business and Service Restrictions](#), effective November 27, all levels of sport within [Enhanced Status \(purple\) Areas](#), that have not been granted an exception by AHS, will have to be closed.

2. Which hockey programs do the new Government restrictions on sport apply?

The Government of Alberta's Enhanced Public Health Measures apply to all hockey programs that are hosted/operate within a community that is identified as an [Enhanced Status \(purple\) Area](#). Members are all asked to watch the above linked website page and be prepared to adapt to the new restrictions adapt should your area be added as an Enhanced Status (purple) Area.

3. What are the criteria for an organization to apply for an AHS exemption to the current government restrictions? Will this apply to hockey?

Hockey Alberta is currently working with SPAR (Sports, Physical Activity and Recreation) to obtain more information from AHS regarding the potential for exemptions. At this point we do not know if consideration will be given to hockey, or any team sports. We will provide more information once we have confirmation on the process and criteria.

4. Can players, coaches or officials that reside in a community identified by the Government as a 'purple region' (with targeted/ enhanced measures) participate in activity with their registered hockey team that is hosted in a community that is not currently a 'purple region'?

Based on clarification received on a November 20, SPAR (Sports, Physical Activity and Recreation) Stakeholder Town Hall, participants that reside in one community and participate with a team in another community are permitted to continue to travel to participate with their team provided it is hosted in a community that is not currently within a 'purple region'.

Example: a player that resides in Alix, AB (under targeted/ enhanced measures) can continue to participate with his/ her team that is registered with Stettler MHA and operates out of Stettler, AB (not currently under targeted/ enhanced measures).

5. Can teams based in a community identified by the Government as a 'purple region' (with targeted/ enhanced measures) travel to participate in activity in a community that is not currently a 'purple region'?

Based on clarification received on a November 20, SPAR (Sports, Physical Activity and Recreation) Stakeholder Town Hall, teams are not permitted to travel to a community that is not currently within a 'purple region' to host a practice or game.

6. Outdoor sports were not previously included in the restrictions, are teams still allowed to hold practices and games on outdoor rinks?

All levels of sport (whether indoor or outdoor) are currently restricted in the impacted areas. Hockey Alberta is currently working with SPAR to determine whether or not outdoor activity could still be permitted by applying the outdoor social gathering limit of 10 people to the activity and still prohibiting the use of locker rooms.

AHS TARGETED PUBLIC HEALTH MEASURES UPDATE FREQUENTLY ASKED QUESTIONS UPDATED NOVEMBER 25

7. Will leagues continue to work with MHAs/ Teams to schedule and group teams not affected by the restrictions?

The recent announcement has had a varying impact on leagues throughout Alberta. We will be working with our league leaders in the coming week to determine what this means in the short and long term.

8. If our league decides not to schedule games during this shut-down time, and our community does not have targeted/ enhanced measures in place, are we free to schedule exhibition games?

Practice and competition are permitted for communities not under targeted/ enhanced measures. If League play does not continue, provided teams adhere to the current cohort guidelines of a maximum of 50 participants and the 14-day break when switching cohorts, exhibition game sanctions can be applied for.

9. Are ice sessions allowed using physical distancing in areas that have additional measures?

The current Government restrictions will only permit one-on-one training. No team/ group activities are permitted to operate if the program is hosted/ operates out of a community that is identified as an [Enhanced Status \(purple\) Area](#).

10. Who should we contact if we identify operators or individuals acting outside the public health order?

Violations of Public Health Orders are subject to fines up to \$1,000 and complaints can be submitted to the Public Health Inspectors by [Clicking Here](#).

11. If a player resides in a community that does not have additional health measures but plays on a team within a community that does, is that player able to take part in ice sessions in their local community?

The player would not be permitted to join another sanctioned Team (and therefore cohort). If the player wishes to skate in their local community on private or public ice, they would be doing so without the support of the Hockey Canada insurance program.

12. Prior to this latest announcement, why was the AJHL still playing games within communities that had additional health measures in place?

The AJHL established a return to play plan under the Government of Alberta's '[Junior, Collegiate and University League Guidance](#)'. They established additional measures to mitigate the risk of transmission that aligns with that guidance. At that time, according to AHS, Leagues operating under that guidance were exempt from the Targeted Health Measures. The Government's November 24 update to the Enhanced Public Health Measures does apply to the programs approved under the Junior, Collegiate and University League Guidance, including the AJHL.
